The despatch date shown above is the date the sample will leave our site in the UK. Please note, this is not the date the samples will arrive at your laboratory. Delivery times vary based on country, if you require further information, please contact LGC. Please note that orders received the week prior to the despatch date may be subject to a despatch delay.

For samples PT-CA-10 and PT-CA-11

In order to ship these samples we need to receive the below:

- If the product is controlled in the country: Import permit with a minimum validity of 3 months. As the samples are despatched from France, the permit must be received in English or French. (Please find more information on page 2)
- If the product is not controlled in the country: Statement of non-controlled substance stated from the authorities

This document (import permit or statement) is mandatory in order for LGC to be able to successfully apply for and receive an export permit. LGC will contact you once you place the order with further details of the product specifications for your permit submission.

The samples will be despatched in September; however, the date may vary depending on approval of all permits.

To ensure we have a sufficient number of participants taking part in the round, all orders must be placed by 06th May 2026. Please do not apply for your permit until further confirmation from LGC.
