## YOUR ORDER

If you would like to renew your order as per your previous year's order, please tick this box:

**RENEW ME AS LAST YEAR**

☐

We will copy over the samples/rounds purchased by you in the previous year and send you an order confirmation for your review. If you would like to add any other samples to your order, please mark them accordingly on the subsequent pages.

If you would prefer to place a different/new order for this scheme year, please review the samples available on subsequent pages and indicate the number of samples required for each sample/round accordingly.

| PT-DU - <b>FULL-W</b> - Full participation using confirmatory methods | Full participants will be able to report for the screening only analytes using immunoassay type techniques and individual analytes by chromatography type techniques. Approximately 210 individual analytes are available and are managed by your PORTAL online screening profile. Participants will receive 3 freeze-dried urine samples, each with a volume of 15ml. | 4                         | <input type="checkbox"/> |                          |
| PT-DU - <b>SCREEN-W</b> - Screening only methods                      | This is designed for participants who report using immunoassay type techniques, including POCT (point of care testing). Participants will receive 3 freeze-dried urine samples, each with a volume of 15ml. The screening groups are as follows:   |                           | 4                        | <input type="checkbox"/> |

|   | Cannabinoid screen   | Propoxyphene screen       |                          |                          |
|   | Cocaine screen   | Tricyclic screen          |                          |                          |
|   | LSD screen   | Integrity tests           |                          |                          |
|   | Please note that it is not possible to report on individual analytes if participating on Screening-only basis.   |                           |                          |                          |

**Reporting Thresholds**

Prior to submitting your results you will be asked to configure your screening profile (**applicable to both screening and full participation**), we recommend that you only select the analytes that you are routinely screening for; any drugs that are detected which you are not routinely screening should be added/removed from your screening profile on a round by round basis.

When configuring the screening profile it's **essential** that you choose the analyte with the reporting threshold that is most appropriate to your laboratory, this will either be the clinical threshold, EWDTS threshold or SAMHSA threshold.

E.g. Amphetamine (Clinical threshold 1000 µg/L) or Amphetamine (EWDTS threshold 200 µg/L)

**Note:** Failure to choose the most appropriate threshold to your laboratory could result in your laboratory being incorrectly assessed.

For details on the full technical specification of the scheme, please refer to the DAU Scheme Description.
